Dr. Joshua LEDERBERG  
Professor of Genetics  
Stanford University, Medical Center

PALO ALTO, California  
U.S.A

Dear Dr. Lederberg,

I am sorry that I could not answer your letter immediately. My new address is presently at the Institute of Macromolecules, Strasbourg, France and the forwarding of the mail took a certain delay.

Thank you very much for mentioning the work of Dr. Y. Ogawa. In our second paper on cardiac myosin (J.B.C. December 1962, in press) we included a reference on the immunological differentiation of cardiac and skeletal myosin (A. Samuels, Arch.Biochem.Biophys. 1960). However we will be very glad to include other evidence like Dr. Ogawa's which we can accommodate in the galley proofs.

Thanking you most kindly for your interest for our work, I am

Sincerely yours.

J. BRAHMS, Ph.D.
